Name: Amit Kumar Ojha
Designation: Full Stack Software Developer
E-mail:amitojha055@gmail.com
LinkedIn: https://www.linkedin.com/in/amit-kumar-ojha/
GitHub: https://github.com/Ojha1111
Mob. No: 9651878218
Experience: 3.2
Location: Bangalore

## Professional Summary:

- Bringing over 3 years of software development expertise in **Telecom** and **Healthcare** domains, adept as a **full stack developer** with skills in Java, Spring Boot, ReactJS, Data Structures, Problem Solving, and Oracle Database SQL
- Skilled **Java Developer** with expertise in **Core Java**, proficient in object-oriented programming, **data structures**, and **algorithms**. Dedicated to writing clean, efficient, and maintainable code, laying the foundation for advanced development tasks.
- Experienced developer with expertise in front-end technologies: **HTML**, **CSS**, and **JavaScript**. Skilled in creating dynamic, responsive user interfaces and manipulating the **DOM** for seamless user experiences.
- Skilled in **Java EE**, encompassing servlets, **JSP**, and EJB for enterprise-level application development. Proficient in the Spring Framework, leveraging features like dependency injection, **AOP**, and **MVC** architecture to simplify Java development and promote best practices.
- Proficient in **SQL** for data storage and retrieval, with expertise in **JDBC** for seamless Java-database interaction.
- Experienced in **React** for building robust front-end applications, emphasizing **SPAs** and organized, scalable codebases through component-based architecture.
- Proficient in **Maven** for Java development, **adept** at dependency management and project organization. Skilled in maintaining efficient, well-structured codebases, enhancing project productivity.
- Proficient in **Git** for **version control**, adept at managing code changes and facilitating collaboration among developers. Experienced in branches, merges, and pull requests, essential for effective software development.
- Skilled in secure Java coding, addressing SQL injection and CSRF vulnerabilities, with expertise in implementing robust **authentication** and **authorization** for application security.
- Skilled in Java application deployment, scaling, and optimization on **Amazon Web Services** (AWS), demonstrating proficiency in cloud computing.
- Experienced in **AGILE Methodology**, contributing to efficient project delivery and collaboration.
- Java Developer with basic **Docker** and Kubernetes skills, aspiring to excel in containerization and orchestration for mid-level positions.
- Experienced in embracing DevOps practices to streamline the software development lifecycle. Proficient in automating processes and implementing CI/CD pipelines with Jenkins and GitLab CI for efficient builds and deployments.

## Technical Summary:

| | |
|---|---|
| **Back End Development** | Java, Python, Spring Boot, NodeJs, Microservices |
| **Front End Development** | ReactJS , Redux , JavaScript , Bootstrap ,HTML,CSS |
| **Domain/Industry** | Telecom, HealthCare, Ecommerce |
| **Build Tools** | Maven |
| **Internet Technologies** | Restful API's |
| **Web/Enterprise Servers** | Apache Tomcat |
| **Databases** | Oracle Database 11G |
| **Version Control** | Git, GitHub |
| **Loggers** | Log4j |
| **IDE** | IntelliJ IDEA, Eclipse, STS |
| **Operating Systems** | Windows |
| **Software Methodologies** | Agile Methodology |
| **SOFT SKILLS** | Team player,Bias for action,Delivery results |

| Client | British telecommunications-BT OSS Advitium Transformation-Telecom |
|---|---|
| Team Size | 9 |
| Technologies | Java, React, Spring Boot, Oracle Database SQL, Agile Methodology, Couchbase |
| Role | Data Migration and Software developer. |
| Project Overview: | SIM (Space Inventory Management), |
| Roles& Responsibilities | Identified and monitored defects throughout the migration process.<br>Utilized MySQL for efficient data storage and retrieval.<br>Implemented Restful web services to enhance front-end functionalities, ensuring seamless user interaction and improving overall user experience.<br>Managed Oracle Database operations, including query crafting, error resolution, and ensuring data precision, encompassing attachments and versions.<br>Implemented data quality rules for various tables such as Building_plan, Condition_Reports, Contractor_drawings, etc.<br>Utilized triggers in the Oracle database to enforce these rules on respective tables.<br>Delivered multiple feature updates, leading to enhanced user engagement. |

| Client | Virtusa Consulting Services |
|---|---|
| Team Size | 5 |
| Technologies | Java, React, Spring Boot, Oracle Database SQL, Agile Methodology |
| Role | Full Stack Java React Software developer. |
| Project Overview: | Health Management System |
| Roles & Responsibilities | Implemented Restful web services to enhance front-end functionalities, ensuring seamless user interaction and improving overall user experience.<br>Identified and monitored defects throughout the migration process.<br>Utilized triggers in the Oracle database to enforce these rules on respective tables.<br>Directed clinical on boarding initiatives, ensuring user-friendly UI, secure clinical access, and efficient CRUD APIs.<br>Integrated operational systems to facilitate seamless patient on boarding and storage of treatment data.<br>Designed intuitive UI for capturing patient details and displaying information, enhancing overall user experience.<br>Delivered multiple feature updates, leading to enhanced user engagement. |

| Client | Virtusa Consulting Services |
|---|---|
| Team Size | 4 |
| Technologies | Java, React, Spring boot, MySql, Agile Methodology |
| Role | Full Stack Software Developer |
| Project Overview: | Ecommerce Application |
| Roles & Responsibilities | Enhanced front-end functionalities by implementing Restful web services, ensuring seamless user interaction and elevating overall user experience.<br>Developed login page and user creation module with role-based access control using Java and Spring Boot, integrated with JWT token authentication for enhanced security measures within the application.<br>Implemented JWT token security feature within the application to enhance authentication and authorization mechanisms, ensuring robust security measures, and deployed the updated system for immediate utilization. |

| Client | JpMorganChase &Co |
|---|---|
| Team Size | 5 |
| Technologies | Java,Spring boot, MySql, Agile Methodology,Aws ,BitBucket,,Jira,Splunk etc. |
| Role | Full Stack Software Developer- |
| Project Overview: | Graphite UI - Mandate-UI Payment Service |
| Roles & Responsibilities | Led the upgrade of Mandate-UI Payment Service from Java 8 to Java 17, enhancing functionality and performance.<br>Developed backend components with Spring Boot, managed code refactoring, and ensured compatibility.<br>Deployed the application on AWS EKS, handling container orchestration and scalable management.<br>Collaborated with Zenith on tool integration and optimized the CI/CD pipeline for smooth deployment.<br>Oversaw the entire deployment lifecycle and monitored performance to ensure operational excellence. |

## Work Experience:

- Presently employed as an Associate Software Engineer at Virtusa Consulting Services since August 2021
- Completed an internship at Internshala from March 2021 to July 2021

## Educational Qualifications

- Completed Bachelor of Technology from Lovely Professional University, Punjab, 2021
- Completed Intermediate from Heliger Borden Education Center, Kanpur, 2016
- Completed High School from City Montessori School, Lucknow, 2014

## Certifications:

- **Oracle Certified Java Associate** from **Oracle - https://tinyurl.com/5czshfcs**
- **Oracle Database SQL Certified Associate** from **Oracle -https://tinyurl.com/y3ukuxhn**
- **Aws Certified associate developer** from **amazon - https://tinyurl.com/7b5yxyy6**
- **Oracle Certified Professional: Java SE 11 Developer** from **Oracle - https://tinyurl.com/mpzrmkxp**

## Coursework:

- Data Structure And Algorithms
- React
- Java Full Stack with React
- Spring Boot

## Interest:

- Traveling
- Self-improvement
- Food
